

Intubation Project

Patient Id:

Gender:

Age:

I. Attributes

1. Previous airway records (easy / difficult)/Not Known
2. Disease: _____
 - Arthritis (stiff joints)
 - Diabetes (limited movement)
 - Down syndrome (abnormal structure)
3. Breathing Problem:
 - Snoring: Yes/No
 - Sleep apnea: Yes/No
4. Symptoms:
 - Voice changes: Yes/No
 - Difficulty swallowing: Yes/No
 - Can't lie flat: Yes/No
5. Injury:
 - Swelling: Yes/No
 - Previous Neck Fracture: Yes/No
6. Previous emergencies (ICU): Yes/No

II. Physical Information

1. Obesity: Body Mass Index (BMI): weight (kg) / height² (m²)
 - Normal: 18.5–24.9
 - Overweight: 25–29.9
 - Obese: ≥ 30
2. Neck Circumference (NC): _____
3. Beard :Yes/No
4. Chest size: _____
 - Large
 - Barrel Chest
5. Neck structure(short / heavy / thick neck)

III. Features / Conditions

1. Mouth opening :Distance _____
2. Mallampati Score
:Class I, II, III, IV
3. Thyromental Distance (TMD) : _____
 - ≥ 6.5 cm = Easy
 - 6–6.5 cm = Medium
 - < 6 cm = Difficult
4. Sternomental Distance (SMD) : _____
Distance: _____

5. Neck Circumference:_____

- < 40 cm = Normal
- 40–43 cm = Possible difficulty
- > 43 cm = Difficulty

6. Jaw Movement:Easy/Medium/Difficult

7. Neck Movement:_____

- > 80° = Normal
- ~80° = Borderline
- < 80° = Risky

8. Tissue Flexibility :Easy/Difficult

III. Images

1) Face Image

- Teeth visibility
- Jaw size
- Mouth size (opening)
- Facial structure

2) Side Profile Image

3) Neck Image

- Tissue thickness
- Fat distribution

4) Ultrasound Image

- Tongue thickness

5) CT / MRI / X-Ray

- Tumors
- Airway narrowing image
- Structural abnormalities
